

Additional features - Customise your location

On HomeSwapper, we've included all the tools and features you'll need to swap your home, but there may be some that you haven't yet used. When you set up your HomeSwapper account, you will have been asked for the areas that you want to live in. But did you know that you can make this much more specific by dropping a digital pin on a map?

The screenshot shows a web interface for selecting a location. At the top, there are two tabs: "The home I want" (selected) and "The home I've got". Below the tabs is a navigation bar with five icons: a location pin, a house, a bed, a pound sign (£), and a leaf. The main heading is "Where do you want to live?". Below this is the instruction "Please save your location before viewing on a map". There is a search bar containing "London" and a dropdown menu for "Within" set to "5 miles". To the right of the search bar is a map icon with a location pin, which is highlighted by a purple arrow. Below the search bar is an orange button labeled "Add another location" and a checkbox labeled "I'm happy to consider any location". At the bottom right, there is a purple button labeled "Next".

If you would like to choose a more specific location than the one you entered when you set up your HomeSwapper account, go to your **Dashboard** and hover over the menu option **My details**, then click on **The home I want**.

You will be taken to the area finder page. Next to the search bar where you typed in the area you wanted to live in, there is a map icon that you can click on.

Click on this and a larger map will open up showing the area surrounding the place that you have typed into the search box. Once you're on this page, you can zoom in and out using the icons on the left-hand side of the page.

If you want to find a more specific location that you'd like to live in, you can zoom in using the + button at the top left of the page. Then simply grab the purple pin with your mouse and move it to wherever you want to live.

To save this preference, just click on the purple **Next** button underneath the map! This will now show up as one of your saved preferences in your **Matches** section.
