## The HomeSwapper Analytics tool

Remember 'Venn diagrams' when you were at school? Remember thinking *'I'm never going to need to remember this'*? Well, you were wrong!

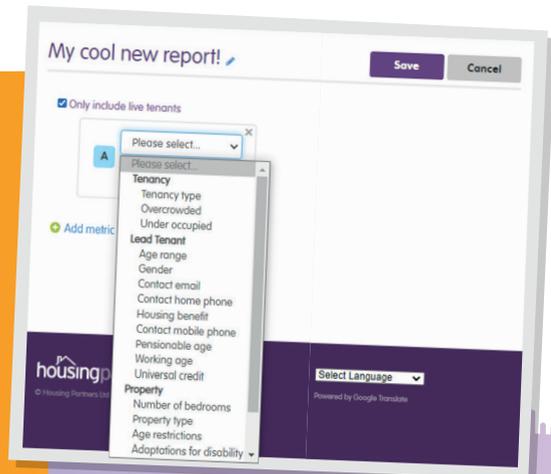

The Analytics tool in HomeSwapper is just that - a useful feature for learning more about your tenants, but not everyone knows about it. You can find this statistical superhero, by clicking on the Analytics option in the top menu of your Dashboard.

### Making your report

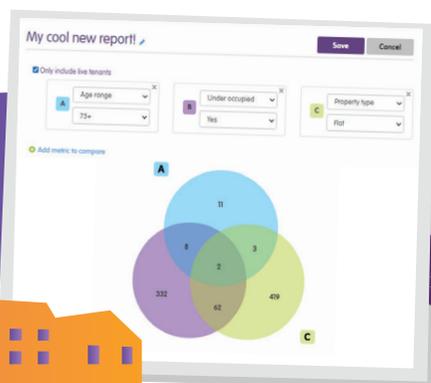

First off, give your new report a nice helpful name where prompted.

Next, start choosing the criteria you want to use:

For example, you might want to know how many of your tenants are 75+, currently under-occupying and living in a flat.

As you start to add criteria, a Venn diagram appears showing how many tenants each one relates to:

My cool new report!

Only include live tenants

A Age range: 75+  
B Under occupied: Yes  
C Property type: Flat

Add metric to compare

Export data Print

Back to chart

View: List Map

Reference	Lead Tenant	Address
1883822	Lead Tenant	Southam Garage 26 Hill Meadows Birmingham Street New Midlands B21 4J
1885248	Lead Tenant	101 St. Southam Garage 26 Hill Meadows Birmingham Street New Midlands B21 4J

Showing 1 - 2 of 2 results

And now the greatest part of this wonder of the report world - If you click on any of the segments of the diagram it shows you who these people are! (You can also export this information to a spreadsheet.)

Finally, if you like what you've done and think you'll need to run it again in the future (e.g. to impress your friends), simply click the Save button and it will be ready next time you visit the site.
